THE REDCLIFF REVIEW, THURSDAY, JANUARY 12, 1922.

A BUSY MAN.

According to reports coming from Edmonton, Hon. Geo. Hoadley, Minister of Agriculture in the legislature, is one of the busiest men in the province.

Since assuming this office Mr. Hoadley has been untiring in his efforts to formulate some permanent policy for solving and dealing with the many problems with which this portion of the province is confronted. He did not take him long to decide that the old fashioned way of temporary relief was a failure, and led to nowhere. Although in some cases this was necessary this year, yet at the same time that this was being done plans were well under way for a more satisfactory and lasting solution of existing problems.

With this object in view Mr. Hoadley has already prepared an elaborate and extensive program of activities throughout the province for this winter and coming spring, an outline of which may be seen in another column of this issue.

There is probably no man in Alberta better posted in conditions throughout the province than Mr. Hoadley, and few who have given more thought and study to them. Because of this the province is extremely fortunate in having a man of his experience and ability at the head of such an important department.

THE SKATING RINK.

Those who have been patronizing the new skating rink in town are loud in their praise of the thoughtfulness and energy of the men who are responsible for starting a movement in this direction and carrying it through to such a successful finish. So suitable is this building for such a purpose the wonder expressed on all sides is that something of this nature had not been attempted long ago.

To put this building into the proper condition for such a purpose required a considerable expenditure of money, and the men who were behind the movement cheerfully provided the necessary means. Now that we have the rink it must be remembered that it requires much to keep it in operation. The only source of revenue is from those who use the rink on skating nights. If, therefore, the interests of those who made such a risk possible, are appreciated, it is up to the skaters to see that it is patronized as much as possible.

This rink is not a private enterprise out of which any one will make any money. As a matter of fact unless it is better patronized it will mean that those who are behind it will have to dig down again before the season is over.

ANONYMOUS CONTRIBUTIONS

This week we are in receipt of two contributions for publications in this paper, but as in neither case did the author sign his name we are unable to publish them. As this is the hundredth issue we have made mention of the fact that we will not publish anonymous articles unless they are signed by the author, and we are beginning to wonder when people are going to learn that no newspaper ever printed unsigned articles.

We do not mean that this that the names must appear in the paper. Contributors may sign any name or pen name they choose, but the editor must know the name of the writer as an evidence of good faith.

This may seem to some a very trivial matter, while, in fact, it is very important. For instance: an anonymous writer might send to a paper an item which to the editor looked like a very innocent piece of local news. It might be an absolute falsehood, and libelous as well. The fact that it appeared in print the editor might be sued for libel. The fact that he didn't write the article would not relieve him from responsibility, and the anonymous one would be laughing up his sleeve.

We are always glad to get communications, correspondence and news items, but we must know from whom they come.

Last week it was announced that the ex-Kaiser was going to marry a charming young widow of his acquaintance. This week the report is contradicted. Congratulations for the young widow are now in order.

The city of Calgary collected \$33,857 in 1921, in fines from bootleggers. It's an ill wind that blows nobody good, even in this "dry" country.

It now appears that some one has decided that there will be no Liberal convention to choose a leader to replace Hon. Chas. Stewart until after the coming session of the legislature, but rather to just select a temporary leader for the present. That is just exactly what the provincial Conservatives did. Now that party is in the southerly class in this province. They have nothing to lead.

Most cities are beginning the year preparing to meet the emergency by getting all factions and forces into some sort of co-operative policy. In that way they believe they can hurry along the business that is likely to break through the commercial clouds. That is the best policy at the present moment.—Calgary Alberta.

Judging from reports coming from the larger centres there is every prospect of a very much in the building lines this coming spring and summer in Western Canada. This should be good news for Redcliff, as it will no doubt mean a busy season for the several brick plants in town.

Today is the tomorrow you worried about yesterday.

A wise old owl once said: "Don't put your wish bone where your back bone ought to be."

IRISH DAIL APPROVES OF PEACE TREATY

BY NARROW MARGIN AFTER A DAY OF HEATED DEBATE THE DAIL IN IRELAND WILL NOW HAVE GOVERNMENT SIMILAR TO CANADA'S

By a majority of 7 votes, 64 to 57, the Dail Eireann gave its approval on Saturday evening to the document drawn up by its delegates at London in connection with the settlement of the Irish Peace Treaty.

The news was received with the greatest enthusiasm and the patient groans, which had waited outside the University building in anticipation of a decision, burst into cheering, even before the official figures were announced.

Ratification of the treaty came after a day of intense excitement and heated controversy. Though the result was as had been expected, the majority in favor of the agreement was greater than had been counted on almost to

Prosperity of Canada Depends on Immigration Lord Shaughnessy Declares Restrictions Must Be Removed

"The present tendency of removing from the immigration laws of Canada all irksome restrictions, which are hampering the entry into Canada of good settlers for the farmlands and forests of the Dominion was presented in no uncertain terms by Lord Shaughnessy, Chairman of the Imperial Council, at the Junior Bar Association of Montreal in the Reform Club."

"The natural feeling that grew out of the war," said his Lordship, "encouraged the placing of restrictions on immigration that have been most disastrous in their results. We must have these restrictions removed. We frequently find it in the fall and winter, not arctic, but men who will not come to our land, and who develop these resources, and there must be an incentive device, the Government to pass legislation that will open the doors to them."

His Lordship further pointed to the need for a more liberal immigration policy throughout the Dominion the spirit of Canada and the mutual understanding and neighborliness between Canada and the Dominion of the Dominion must be promoted by every possible means.

Wrote by Work Only. Although some of the members of the Junior Bar on the threshold of their profession, he pointed out to them the high road to success. Not by luck or by special grace, but by hard work, devotion to the profession, and strict observance of the ethics and dignity of the law would they achieve the objects they were aiming at.

Lord Shaughnessy recounted in humorous fashion how in his early youth he had conceived himself of the legal profession, and had studied the law for many years, but just as he was on the verge of entering the profession to gain the necessary experience prior to embarking in that profession, he was informed that the members of the Junior Bar on the threshold of their profession, he pointed out to them the high road to success. Not by luck or by special grace, but by hard work, devotion to the profession, and strict observance of the ethics and dignity of the law would they achieve the objects they were aiming at.

In general, his Lordship expressed how important they were on the staff of the railway, and he pointed out to them the high road to success. Not by luck or by special grace, but by hard work, devotion to the profession, and strict observance of the ethics and dignity of the law would they achieve the objects they were aiming at.

They would accomplish nothing through luck or through special grace. I told them, however, that success will come to those who work hard, and devotion to their profession. It must be a matter of constant study, and they must keep abreast with the law and if they are to be prepared for any emergency that arises in trial of cases, they must pursue rather a broad range of reading. I have no doubt that we have amongst us here to-day a great many who are called upon to be leaders in the bar, but prominent men for counsel in the courts, and for the dignity of the law.

the last minute.

By the terms of the treaty Ireland will now be able to form a government very similar to that enjoyed by Canada.

NATURALIZATION ACT REFORM IS FAVORED

The convention of the United Farm Women of Manitoba went on record as strongly favoring a reform in the Naturalization Act, by which a married woman would not automatically

take the nationality of her husband, but should retain the right to choose her nationality. Another resolution calls for the abolition of voting restrictions and for the amending of the Dominion Elections Act, so that British subjects by birth or naturalization be accorded a vote.

There are still a few of our subscribers who have not yet paid up the subscription. You should be sure to pay the bill on the 15th of the month, as it will be the kind of a paper but you and we wait.

Comprehensive Banking Service

Whatever your banking requirements may be, any one of the 218 branches of this bank can serve you satisfactorily.

From a small personal savings account, to a volume of foreign exchange, or from collections on drafts to advice concerning investment, our service is prompt and adequate.

Provincial Govt. Is Helping Out Unemployment

Public Works Department Making Big Expenditure—Also Plan Railway and Telephone Extension

"Public works aggregating between \$800,000 and \$900,000 have been authorized by the provincial government, since it took office, in efforts to provide employment during the present period of distress," said Alex Ross, minister of public works. "This represents work on bridges, buildings, roads, etc., in various parts of the province and actually is money over-expenditure on the estimates. The provincial government has guaranteed the bonds of the United Irrigation district south of Lethbridge. In doing this, this may create additional work. Immediately the city of Calgary agrees that the ownership of the old Don Bridge at Hillhurst lies with the province, we will have it dismantled and removed in sections to other parts where smaller bridges are required."

"The government has arranged to sell, as soon as possible, this month, about \$2,000,000 debentures for all-weather extension work and \$750,000 debentures for railway extension in the north. All these expenditures are arranged on the estimates, but it was agreed by the government that it was necessary to help out the situation and we rely on the legislature approving when it meets in session."

To Make Amendments To the Cow Bill

"Amendments to the Livestock Breeding Act, commonly known as the Cow Bill, are being planned," Gen. Hoadley, minister of agriculture, said. "Important features will be that the buyer of cattle under the bill will have to assume a certain amount of financial obligation from the time of the purchase. The old Cow Bill will give buyers a five-year term of financial obligation. This feature is in the bill has led to many difficulties as in the case as the farmer had no real means to the cattle for five years."

Gen. Hoadley estimates are being planned by the department of extension of the University for a four or five year period in Calgary and Edmonton. There will be at Calgary about March 6 and at Edmonton about March 12.

Addressing the United Farmers of Manitoba, J. L. Brown, M.P. for Lethbridge, said, "I am glad to see that the government is taking steps to improve the situation of the farmer."

MAY ENTER THE POLITICAL ARENA

Grain Growers' Assoc. Requested to Make Such a Move—Matters Will Be Taken Up at Annual Convention

A request for the entry of the Saskatchewan Grain Growers' Association into provincial politics has been received by the central office of the association and will be brought before the annual convention in February, thus discussing a plan on the agenda for a discussion on the provincial political situation.

An announcement to this effect was made by H. B. Musselman, managing director, at the conclusion of a two-day session of the executive. "It was also announced that considerable correspondence from local co-operators, Hon. J. A. Maharg on his action in withdrawing from the provincial government was presented to the executive."

One of the primary objects of the meeting was to draft an outline program for the coming convention. It was decided to invite T. A. O'Carroll, the convention, and all the elected representatives of the province will be invited to be with him on the platform at the conclusion of the meeting.

It was also decided to invite the public, when it is expected Mr. O'Carroll will outline the federal political situation. His remarks will be supplemented by some of the other members of the party in the house of commons. It is proposed in this manner to give recognition to all candidates elected to the federal parliament from the province on the Grain Growers' platform.

ARRANGING DANCE FOR U.P.A. DELEGATES

The U.P.A. and U.F.W.A. delegates will enjoy a social evening and dance arranged exclusively for them on the evening previous to the annual convention, at Calgary, Monday evening, a party held, from 8 to 12. The Plaza, a Longfellow building, corner, 1st Street West and 6th Avenue, has been engaged for the evening.

COMMUNITY SHIPPING OF DRESSED POULTRY

"The first car load of dressed poultry shipped from the Grande Prairie, during the week and was sent to over its capacity 20,000 pounds with dressed turkeys, chickens and ducks in the first attempt at community shipping from this district and completed all first grade birds."

Four and a half million dollars will be required to finance the 1932 operations of the Rural Credit Societies of Manitoba according to officials of the Manitoba government. Loans for 1932 are estimated to be \$2,000,000. The 1932 office work and to assist in buying seed.

Minister of Agriculture Is Trying to Solve the Problems of Province

Is Arranging Important Meetings to Discuss Problems and Interest the Farmers in Production of Goods for Which There is a Ready Market— Courses in Irrigation Farming

If the farmers of Alberta can be encouraged to produce the stuff for which the market is ready, the province will be in a position to solve its problems. The minister of agriculture, Gen. Hoadley, is trying to solve the problems of the province by arranging important meetings to discuss the problems and interest the farmers in production of goods for which there is a ready market. Courses in irrigation farming will be arranged for the farmers of Alberta.

This is the big idea behind the program of winter instructions. It has been planned by the department of agriculture, under the direction of Gen. Hoadley, the minister, a program which is more comprehensive than was ever before undertaken by the department. The details of this program was announced Thursday by Deputy-Minister Craig, and it will be under way in the next week or two.

The first big feature of this program will be the special train which will be run from the southern end of the province through to the Peace River country, carrying exhibits of live stock and farm products in special times. This train will run over the C.P.R. lines, and the dates and names of places of stop will be announced in a day or two.

Another very important feature of the winter's program of Mr. Hoadley's department will be the holding of three conventions at different points in southern Alberta, at which farmers will have a wide area and business men of the towns adjacent to the place of meeting will be invited to a one day's conference, or longer if necessary, to discuss the pressing problems that confront the residents of this south country. The idea of these conferences is to bring the business men and farmers into a mutual understanding of each other's troubles, and to encourage the small mixed farming idea rather than the farming of such large areas.

A reference to this nature was held at Lethbridge last year with great success. This conference is to be held at Medicine Hat, and it is expected

that a large attendance will be the result. The other points will be announced shortly. At these conferences officials of the department of agriculture will be in attendance, as well as Gen. H. Hoadley, minister of agriculture, and W. H. Patterson, superintendent of the Dominion experimental farm at Lethbridge.

An effort will be made to interest the banks, loan companies and business men in the towns and cities adjacent to the meeting places of these conferences. These affairs will be held some time during February or March.

Another big feature of the winter's program will be a series of courses in irrigation farming to be held at various points in the irrigation districts, to be announced shortly by Mr. Hoadley. These courses will cover a period of four or five days each and will be held in complete as possible in methods of irrigation farming, which will be developed by the department of agriculture with the advent of the new irrigation projects.

A very important feature also will be the series of meetings to be held at twenty-four places in southern Alberta to start the last week in January.

Alberta Will Gain Four Seats by a Re-Distribution

During the last ten years the population of Quebec province has increased by 17.1 per cent. Census figures issued shows that Quebec now has a population of 2,549,007, as compared with 2,085,776, an increase in number of 463,231.

Census totals for six of the nine provinces have been made for the totals for British Columbia, Ontario, Saskatchewan and the Yukon and Northwest Territories still to come. For the other provinces already tallied the population reaches 4,545,275. Assuming that the remaining provinces will total in the neighborhood of 4,000,000—the last census their combined population was rather less than 3,400,000—this year's census will give a population for the Dominion of about 8,500,000. The total population as shown in the 1911 census was 7,596,387.

Following the last census, the unit of representation was 35,000, after the 1911 census. Monday's figures, with their increase in Quebec population, bring the unit of representation to 36,000. On that basis, the maritime provinces will, following the next redistribution, lose three members; Manitoba will gain one; Alberta will gain four.

Municipal Union Requests Legislature To Make Changes

Requests for appointment of a tax commission to study taxation problems in the province is a uniform city and county thing, now brought to the provincial government by a delegation of the executive of the Union of Municipalities.

The delegates met R. G. Reid, minister of municipalities; Alex Ross, minister of public works; Geo. Hoadley, minister of agriculture; W. Smith, minister of railways; Parker Hain, minister of education; and others.

The delegation expressed itself as the most important being very well satisfied. In fact, stated that the interview had been most satisfactory thus far.

Requests made by the delegation were contained in resolutions passed at the recent convention, Calgary. They included abolition of school boards, appointment of a tax commission, the city day act, a division of the salaries with municipalities, privilege for municipalities to impose school taxes, a town planning act, rearrangement of the method of collecting school taxes, changing of qualifications for mayor and councilors of towns and villages.

The members of the cabinet gave careful attention to the questions and promised every consideration.

STEPS ARE TAKEN TO HAVE WHEAT BOARD

Definite steps have been taken by the Canadian Council of Agriculture towards the re-establishment of the Canadian Wheat Board in a resolution which "urges the new Federal Government to re-institute the Canadian Wheat Board to handle the wheat crop of 1932 and until such further time as world conditions again become normal."

J. W. Wilkinson, international organizer of the Brotherhood of Carpenters and Joiners, has asked the labor convention at Lethbridge just how far labor men are prepared to go in the question of political affiliation with the farmers.

Labor Party in Medicine Hat Want Changes

DRAW UP DEMANDS TO BE PRESENTED TO PROVINCIAL AND FEDERAL GOVERNMENTS

The Dominion Labor Party appointed Mr. W. G. Johnston, M.L.A., as delegate to the Canadian Labor Party convention in Lethbridge on Jan. 12. The meeting is being held at the Provincial legislature and also amendments to the city charter.

It was decided that the Dominion government should be asked to pass the labor legislation outlined in the Labor platform, and the party decided to ask also for Federal legislation as follows:

Full political freedom for Canadian National Railway employees.

Protection of Medicine Hat's natural gas from exploitation.

Prohibition of control of natural resources.

Labors to be represented on the Canadian National Railway Commission.

In provincial affairs it was decided to ask for legislation as follows:

Proportional representation.

Amendments to the Municipalities Act so that greater allowances may be made.

Amend Election Act so as to provide for advance polls at elections.

Date of provincial elections to be set by the Legislature and not by the party in power.

Raise the school age to 16 years.

Have school books printed by the government and sold at cost.

Requesting the Legislature to ask for amendments to the city charter as follows:

Abolition of property qualification for municipal candidates.

Adult franchise for elections.

Abolition of the right of veto.

Would Give Public Ownership a Trial

"Give public ownership of railways a chance," was the appeal made by Chas. Stewart, Minister of the Interior, at the Kiwanis club luncheon at Edmonton at which he was a guest. In the first place, Stewart said, the railways have become a public utility since becoming a public utility of the Canadian government. Mr. Stewart said people ought to give the national railways a fair chance to make good before they declared against or saw them transferred again to private hands.

Mr. Stewart expressed hope that there would soon be a satisfactory settlement of the natural resources question, and expressed the warmest hope also that he would find a seat in Alberta. He said he had not had great success in the natural resources field, where men better entitled to his position than he, but he hoped to be able to render service to the people of the province.

MAKING CLOTH NOW IN BRITISH COLUMBIA

Clothes of the finest quality are now being manufactured in Vancouver from cloth woven in British Columbia from British Columbia wool. During the past year 21,000 sheep were clipped for this industry alone. In addition to making clothes of the material a rougher quality of material is being utilized in making mackintoshes and overalls for lumbermen.

STANDARD SCHOOL BOOKS IN PRAIRIE PROVINCES

Further co-operation in the matter of educational standards between the four Western Canadian provinces has been achieved in a standardized reader for the entire West. Past educational conferences between the four provinces have been responsible for the development of a standard training in normal schools and a standard standard of admission.

Alberta Investigating The Liquor Business

No definite decision in regard to alterations in the liquor law of Alberta will be made by the Provincial government until after the return of Attorney General J. E. Brownlee from the east. This news was obtained by Premier Greenfield on Monday morning, who had just returned from the inter-provincial conference at Winnipeg. The Premier said Mr. Brownlee would look into the question of liquor control in Ontario and Quebec before returning home about the 15th of next month. With these facts before them the provincial cabinet will deal thoroughly with the liquor law before the legislature opens on February 28, and will submit their recommendations to the house in due time.

THE REVIEW AND Canadian Power Farmer

One Year \$2.00; Six Months \$1.00

YOU CAN GET 150 MORE
FOR A BUSHEL OF WHEAT

That Is What You Can Do Provided You Take Advantage Of Our Offer

We have made arrangements with the E. H. Heath Co. Limited who publish the CANADIAN POWER FARMER whereby we are able to offer that farm magazine together with our own weekly at the one price for both papers.

The CANADIAN POWER FARMER is Western Canada's biggest farm monthly. It is now in its twentieth year and means that it is thoroughly established throughout the West. It deals with the mechanical side of the farm. Every issue is full of helpful hints and experiences on the operation of all kinds of farm machinery from a washing-machine to a tractor. Its editor has just completed a trip of several months over Western Canada in a motor car for the purpose of studying the mechanical needs of the farmer. He visited the farmers, lived with them and worked with them. The results of his trip will appear during the next twelve months.

This offer may be withdrawn at any time. Without doubt your intention is to renew for this weekly, then why not take advantage now. Your subscription to THE CANADIAN POWER FARMER for the same price as this weekly alone. This is where you make \$1.50 on a bushel of wheat.

Mail your cheque or drop into our office the first time you are in town.

Canada's Opportunity

Feelings of unrest and the state of depression which have prevailed in Canada are but a reflex of similar conditions throughout the world, and the cause can be attributed very largely and directly to conditions brought about by the Great War. Only through a general improvement in world conditions can a permanent betterment be effected, but in the bringing about of that general world improvement each nation has a part to play. In addition, each nation must assiduously seek to work to overcome existing difficulties and find a solution for present problems as they are found to exist in each particular country.

The conference on the limitation of armaments at Washington is one important step towards bringing about what cannot fail to be a vital factor in reducing the burden now imposed on the economic structure of the world, and in lowering the tremendous load of taxation levied on all peoples. Aside from the enormous reductions to be effected in war expenditures, the agreement for limitation of armaments, which now seems assured, will have an even more beneficial effect because the result must be to greatly reduce the danger of war in the future, thereby giving confidence and stability to world finance, trade and commerce.

The successful outcome of the negotiations between the British Government and the representatives of Southern Ireland is a second and enormously important step towards a reduction of the confidence throughout the English-speaking world. It means much to the whole British Empire as it removes the one great danger spot of friction and ill-will within the Empire. The solution of the Irish problem also means a betterment in the relations between the Empire and the people of the United States, and this is of the greatest importance to Canada and cannot fail to have a steady and beneficial effect in this Dominion.

A third event, bound to have a good effect on business conditions throughout the Dominion, is the holding of the general election in this country, when, for the first time in a decade, the people have had a free and untrammelled opportunity to pass judgment on questions of purely domestic policy. Until a verdict of the people was obtained there was a constant threat of a revision of the political situation and a consequent uncertainty. The people of Canada, had a good reason to be depressed and divided into several groups on economic questions and the impression prevailed generally that for a period of years it was going to be extremely difficult to carry on government in this country without resort to log-rolling and the making of dangerous compromises. This inevitably had an adverse effect on business and the people as a whole.

Quite apart, therefore, from any consideration as to which one of the three political parties has emerged victorious from the battle of the ballots, the people have a right to feel that one of the three has been given a sufficiently large following in the new Parliament to enable it to direct and carry on the business of government. This, in itself, is bound to have a good effect on the confidence and uncertainty, and with the ending of the uncertainty there will follow a removal of much unrest. Depression will thus, to a very considerable degree, give place to confidence and with increased confidence a renewal of activity will follow.

It remains now for each community and individual citizen to loyally accept the results of the majority, and for the political forces in a great co-operative effort to develop the great natural resources of this country to their maximum extent and thereby swing Canada into an era of prosperity for all. Canadians should enter into this great national work with stout hearts and a will to succeed. "It can be done." The divisions and feelings engendered in the past should now be buried with that dead past. What is wanted is a united Canada; a Canada with a forward look; a Canada imbued with optimism; alive with energy, thrilled with a national enthusiasm, and inspired with a true Canadian national spirit. It means that each citizen must work and work hard, and it means be the business of government and of every community and individual to see that remunerative, constructive work is provided for all.

The dark clouds of adversity which have for so long hung over the world are lifting; there is a silver lining all around them, and that lining is broadening and growing brighter all the time. Through a union of all their forces, and the application of their energy and skill to the development of their great wealth of natural resources, the Canadian people can easily place this Dominion very quickly in the front rank of the nations treading the paths of prosperity.

Too Many Short Cuts

Efficiency Is Not Reached Until Details Are Mastered

Learn a trade and don't be satisfied until you are the master of it. The details are the key to the trade and are able to prove you are a specialist at your job. One great trouble today is that short cuts are taken to shorten against time and the result is often a "botch" turned out instead of a workman. The name is often true of school teaching, too; anything that is in the prescribed time, and as a result it is often a poor stab that is made at the examination.

Quickly Relieves Constipation

Don't let constipation poison your blood and cut your energy.

Small Pills—Small Dose—Small Pain

Manlaughter in 2nd Degree

Using a razor—bad stuff—but many people do it for their careers. The only remedy that is indicated and sure. Putnam's Corn Extractor, which is taken to shorten against time and the result is often a "botch" turned out instead of a workman. The name is often true of school teaching, too; anything that is in the prescribed time, and as a result it is often a poor stab that is made at the examination.

Goats Hold World's Record

Gave Over One-Fifth of Weight in Milk

What is believed to be a world's record yield of milk in proportion to the animal's body weight was given recently by a goat belonging to Mrs. Porten, of Bayfield, Essex, England. Weighing just under 100 lb., and standing only 52 inches high, the goat was milked three times in one day and gave a few ounces above 20 lb., or 3 gallons of milk. This is over one-fifth of her entire body weight and no cow has yielded in milk more than one-seventh of her body weight.

Greatest Level Surface in World

South America has the greatest unbroken extent of level surface of any region of the globe. The plains close to the Orinoco River can scarcely be detected over an area of two hundred thousand square miles.

Minard's Liniment For Distempers

Buffalo Meat For New Year Banquet

Will Be Furnished From Park At Midnight

Members of the Canadian Camp will be regaled on buffalo meat from Wainwright Park at their annual dinner in New York next February. The Dominion Parks Board will sacrifice an animal for the occasion, which will be the twentieth of the series of this annual event. Last time between 700 and 800 members attended.

The Canadian Camp is composed of men and women who have camped at one time or another in Canada. The objects of the association are the promotion of fellowship and the observance of the blither aspects of recreational politics and sportsman ship.

Best Have Smallest Pits

The smallest apartment houses are those occupied by bees. In a cubic foot of honeycomb there are about 300 cells.

DIET NOT EVERYTHING IN KEEPING HEALTHY

Your table may be loaded with food and wholesome, yet you don't get strong. What's the trouble? You're not getting enough exercise. The bowels are not active. Relief is quickly supplied by Dr. Williams' Pink Pills. They make weak sixty-pound strong and vital because they keep the system clear. Inactive circulation of the blood, the system is not getting enough of the oxygen that is so essential to health. Dr. Williams' Pink Pills, which good looks good spirit, good health, and good character of the system, is a good thing to have on hand.

360 Characters on Typewriter

A typewriter has been introduced into India which will write the three hundred and sixty characters of the Bengali alphabet.

WHEN NERVES ARE NEAR EXHAUSTION

A Tonic Should Be Taken To Enrich the Blood

When you become so exhausted after a day's work that it is time to go to bed, it is time to take a tonic. Failure to do so leaves you with a nervous system that is near exhaustion. Dr. Williams' Pink Pills will enrich the blood and give you a new reserve of energy.

Dr. Williams' Pink Pills will enrich the blood and give you a new reserve of energy.

Miss Flora Boyko Tells How Cuticura Healed Her Pimples

"My face was very ugly at first, with pimples that disfigured it. I tried many remedies, but nothing helped. Then I used Cuticura and in a few days the pimples were all gone. My face was clear and healthy again."

"I had a very bad case of pimples, and I was very ugly. I tried many remedies, but nothing helped. Then I used Cuticura and in a few days the pimples were all gone. My face was clear and healthy again."

Rich Embroidery Trims a Coat of Potril Towel

By Marie Belmont

This lovely coat is developed in tartan. Potril, trims, combined with dark brown, and is chosen for the upper part of the coat as well as the under part of the sleeves. The skirt of the coat is lavishly adorned with dark brown embroidery, and the sleeves are the upper part of the skirt. The wide belt is slipped through a buckle of unusual size, while a solitary button fastens the collar. The last that completes this is of brown hatter's plush and is trimmed with flowers.

MRS. MARY WILHELM

"No matter what I should say about this, it would be to say, 'Good night, Mary, South Side, Pittsburgh, Pa.' I never dreamed it possible for a medicine to restore me to the splendid health I now enjoy. In fact, I had almost resigned myself to being an invalid as I could see I was losing weight and strength every day, and no relief was in sight. For three years stomach trouble, headaches and nervousness made my life miserable."

"The first bottle of 'Felix' acted almost like magic and it wasn't long until I was not well and strong that I had hardly realized I had ever known a sick day. I am like a different person in every way, pure, active, sleeping, feeling and looking better than in years."

Felix is sold by leading druggists everywhere.

Growing Timber on the Farm

All Land Has Spots That Can Be Utilized

Timber is essentially a poor-land crop. Steep slopes, poor soils, rocky land, unusual corners, gullied and wooded tracts—all these afford opportunities for growing timber profitably. A careful survey of the average farm will reveal a surprising number of spots of this sort which can be utilized to advantage. If they do not already have trees, planting them with the proper varieties will materially increase the value of the land.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a safe, effective remedy for all stomachic and intestinal worms without injury to the system. It is sold by all druggists and is thoroughly and reliably effective, and though in some cases it may cause vomiting, it is an indication of their powerful action on the system.

British Cattle Embargo Simply A Protection Of Interests Involved

The report of the Royal Commission on the Importation of Store Cattle into Great Britain, has now been published, and a synopsis will be of interest to many of our readers. An outstanding feature in the decision of the committee is that the country's cattle are free from any form of contagious disease that would necessitate their exclusion. The question resolves itself then into one purely and simply of protection to the British interests involved. The conclusion reached, given at the end of the report, are that the admission of Canadian cattle for the purposes other than immediate slaughter would tend to increase the meat supply of the United Kingdom; that such admission would tend to cheapen the meat supply of the country; that the importation of Canadian store would tend to increase the number of the cattle; that the introduction of Canadian cattle would advantage the milk supply of the country; that the cost of transportation furnishes a certain measure of protection to the breeding interests of Britain; that the restriction of small farmers in the Highlands might, in some degree, suffer from competition; that the Irish farmers would experience some diminution in their market. Although the term livestock is used, also sheep and swine, the commission thought that the admission of cattle was practically the sole subject of inquiry. The committee also considered the matter regarding the admission of sheep, of which Ireland, it was said, could supply 50,000 more annually, and also stated that the importation of sheep into Ireland was entirely prohibited. The estimate of the number of cattle that could be supplied yearly was upwards of 200,000.

Progress of Civilization

High Powered Car May Not Be An Indication

Somebody has recalled that twenty years ago, the first motor car appeared in Toronto. It looked like an ordinary buggy with a one-cylinder gas engine running underneath. It was capable of a speed of eighteen miles an hour under favorable conditions.

A comparison of the automobiles of twenty years ago with the luxurious high-powered cars of today brings about an understanding of the progress, mean by modern progress. If we could measure the development of the race, to civilization by the amount of machinery we ought to be making wonderful progress; but somehow we feel that this cannot be. Today it seems rather ridiculous to think that the race has made such progress in civilization during the past twenty years. Sometimes we think that much of our boasted progress is like that of the crab, which moves, no doubt, if it makes movement at all, backward.

Perhaps the situation is better than it seems; let us hope so; but to the pedestrian who feels that he takes his life in his hands every time he crosses a busy street, it may seem that the horseless buggy of twenty years ago, with its speed limit of eighteen miles an hour, was more of a useful servant and less of a public menace than the modern "motorcar."

From the Woodstock Sentinel-Review.

Arctic Expedition Ahead Of Time

Crew Confident That Voyage Will Be A Success

The schooner Nordost, with the Arctic expedition headed by Donald B. MacMillan, had entered Hudson Bay on August 3, several days ahead of its schedule, and it was hoped to pass through the dangerous Foul Bay, Mealy Strait on the west coast of Inland in ten days. The letter was dated "On Board the Nordost, Foul Bay, Lat. 64 degrees north, Longitude 72 degrees 30 minutes west."

This was the last message received from the explorer said to send that unless the people at home heard from the expedition in ten days, or May it would indicate they had not been able to pass through the strait; and had been forced to pass the winter further down the coast. MacMillan reported himself and crew of six well and happy and content of accomplishing the work mapped out for them.

The recent census figures show that seven out of every ten colonists in the British Isles are women.

W. N. J. 1928

THE NEW PREMIER

Hon. William Lyon Mackenzie King, leader of the Dominion Liberal Party, has been elected premier of Canada.

Englishmen 100 Years Old Flying Interests In Airplanes

England can boast of many living Englishmen, but the most remarkable of these is a man who is now 100 years old. His name is Isaac Lamb, Ash, Surrey, who was born on Sept. 14. He is proud of the fact that he can still share himself. One of his greatest enjoyments is to sit in the garden and watch the airplanes flying overhead. "I have become quite an expert in airplanes," he said. "My sight is so good that I am able to distinguish the difference between the various kinds."

And taking a breast nut from his pocket, Lamb broke it up with his keratol for inspection.

Commissioner On Claims

Will Investigate Legions of Canadians Caused By War

Sir Douglas Hays, Chief Justice of New Brunswick, has been appointed a commissioner to investigate claims of persons residing or carrying on business in Canada, who have been subjected to loss arising through the destruction of life and property through the illegal warfare of the enemy. He will also investigate claims of persons residing or carrying on business in Canada, who have been subjected to loss arising through the destruction of life and property through the illegal warfare of the enemy. He will also investigate claims of persons residing or carrying on business in Canada, who have been subjected to loss arising through the destruction of life and property through the illegal warfare of the enemy.

Indian Rulers Entertain Royalty

Novel Experience Even For Meir To British Throne

The Prince Wales is experiencing his first taste of the opulence and splendor of Indian princes as the guest of the Gaekwar of Baroda, one of the most powerful native rulers, whose resources are said to be almost unlimitable and whose yearly income is placed at many millions of dollars.

It is a novel experience, even for the heir to the throne of the world's greatest empire, for undoubtedly no present-day monarch has at his disposal the facilities for such gorgeous displays and pomp as the Gaekwar of Baroda and many other Indian potentates who will play host to their future sovereign.

Profit In Co-Operation

Basketweaver Co-Operative Elevator Company Report Good Year

The annual meeting of the Basketweaver Co-Operative Elevator Company has been held, and announcement is made that the profits of the company amounted to \$78,412. It was also announced that the Commission Department of the company had handled during the present year 27,124,118 bushels of grain.

U.S. Lines Controlled By Canada

J. W. L. Clark, of the Pacific Coast, at a meeting of the United States Shipping Board, made the assertion that thirty-eight United States railroad lines were controlled or influenced by Canada.

Spending Money at Home

Spending your money at home, thereby helping your own town and local economy.

Honest Perils

A black necked catfish \$55,000 in cash was found on the side of a Paris street, the manager of a restaurant, a correspondent. It had been forgotten by a bank messenger, who was greatly surprised to find the catfish delivered to the lost property office where it lay among newspapers and odd goods awaiting reclamation.

Captain Miles's Death

Five killed tonight, piled one on top of the other, would not seem to heighten the death toll in Northern Michigan. A million and a half cubic feet of material was removed in sink hole during reclamation.

To Manx / Original too

The Arctic Ice Commission, of Winnipeg, with a capital of one million dollars, will erect a plant to manufacture artificial ice with a capacity of 200 tons daily. This is in addition to their natural ice harvest.

German Alarmed

Over Wine Export

Foreigners Have Bought Almost Entire Output Of 1921

Hundred of thousands of foreign buyers, Belgians and Hollanders, taking advantage of the present low value of the German mark, have in the month bought the entire German wine output of 1921.

The British wine trade by foreign buyers, who are a source of bitter lamentation to the German wine growers, who fear that but little of the precious liquor will be left for their own enjoyment.

German officials have been seeking means to prevent Germans from being deprived of this year's excellent wine, and from having to purchase inferior vintages of other years at higher prices. As a last effort to retain the remains of the 1921 crop, an agitation has been started to force foreigners to pay a higher price for the wine than the Germans.

Remarkable Potato Yield

Marcelin Farmer's Record Higher Than Government Experimental Stations

Eight hundred and fifty-eight bushels of potatoes to the acre is the record for this year from a plot owned by E. Kuntze, Marcelin, Saskatchewan. While this yield may not be a record in itself, it is higher than any of the Government Experimental Stations. It is now remarkable owing to the fact that this particular plot of land has been planted continuously to potatoes for the last four years, each year showing a higher yield than the previous one. The following are Mr. Kuntze's records from 1918 to date:

1918—425 bushels.

1919—425 bushels.

1920—425 bushels.

1921—425 bushels.

In view of this it is quite possible that the yield may yet be higher still, but the owner is figuring on investing one thousand bushels to the acre in 1922.

Advertising An Unseen Force

Invisible Like The Wind, But Results Are Seen

The force of advertising is invisible, but you can feel it, and Ernest C. Good, Economic Editor of the Day Goods Economist, tells a story of a conversation between an advertising man and a merchant that illustrates the point in interesting fashion.

"Ever have your hat blown off?"

"What blew it off?"

"The wind."

"Did you ever see the wind?"

"No."

"Well, advertising is like the wind, no visible force, but you can feel it. It just goes on and you will see the result just as you saw your hat blowing down the street."

Direction Friend Saves Ship

Captain of Lord Antrim Received Bearings By Wireless

Had it not been for the direction friend of wireless telegraphy, the SS. Lord Antrim, which docked at Montreal at the end of the month, would have been wrecked, would have been dashed to pieces on the Virgin Rocks, situated off the banks of Newfoundland.

Captain Jarvis, commander of the big freighter, explained that while his vessel was off the treacherous coast, a terrific gale had been encountered the severity of which made imperative to leave it. Completely at a loss as to his whereabouts, he communicated with various wireless stations. They immediately sent him his bearings and with this data to work on, he made the startling discovery that his ship was drifting in the dark straight for the Virgin Rocks at a speed of nearly eight knots an hour.

Specied Trout In Northern Rivers

Fish Are Identical With Those Caught In Nipigon

The speckled trout streams of Northern Ontario, invaded yearly by sportsmen from all over the continent, have a real find in Northern Ontario. These speckled trout, identical with those found in the Nipigon River, have been caught in the Kettle Lake, the Nelson River.

War Mascot Dead

Cat Attached Himself to French Soldiers at Amiens

The French press pays tribute to a hero of the war, whose death has just been announced. The hero in question was named Diamond and was a cat that attached himself to the French in the lines before Amiens, every day Diamond might be seen breathing life way through the entanglements to the German front trenches. The Poles were afraid that some harm might come to his daily ramble, in order to protect it they tied a piece of cigarette around his neck before it started out to be daily ramble, bearing the words: "I bring you cigarettes; do not kill me!" Diamond being a very brave, had a right to be comfortable when the armistice was signed, and was sent to an animal hospital in the hands of the Countess Yurkevich at Neuilly, where it died.

Breaking Up Stone Walls of Samoa

Reminders of Days When Cannibals Lived On Island

Many miles of ancient stone walls, which bear witness to ancient Samoa savagery, are now being broken up and used as road metal.

These walls form great enclosures, and have been built with stones of the ground as to prevent getting into the neck and back of the wall.

Better Methods Needed

For Improving Grade Of Western Wool

The wool from the farms of the provinces of Alberta and Saskatchewan was sold through the wool-growers' co-operative organization and graded by Dominion Government graders has graded lower, been liable to sell, and as a result fetched lower prices than that from other provinces. Not only is this true when the comparison is made with the range wool, where different breeding and conditions would justify the difference, but it is also true when these wools are compared with the domestic wools of Eastern Canada, where the fleece are of similar breeding and are fed under farm conditions. There is no inherent disadvantage in the climatic or other conditions of these provinces to justify this inferiority. It is due wholly to poor methods in the breeding, feeding and handling of the farm flocks. A few years ago the better from these provinces was actually had reputation, now it takes its place with the very best. That change was brought about by intelligent improvement in the dairy end of farming and wool-making. A similar improvement could be made in the quality of our wool.

National Progressive Leader

Hon. T. A. Cresser, Leader of the National Progressives, whose forces made almost a clean sweep in the Prairie Provinces.

Thinning Sheep Will Be Good

Muskatere Have Increased In Northern Saskatchewan Since War

Judging by reports received by the sheep guards, the rangers will have a splendid season in Northern Saskatchewan. More licenses than last year have been secured and indications point to the fact that muskrat, heavily depleted during the war and the years of high prices, have again increased considerably in numbers in the northern part of the province. These, too, will provide good trapping, but the catch of beaver is likely to be small.

National Dairy Council

The annual meeting of the National Dairy Council will be held at the Fort Hotel, Winnipeg, on Monday and Tuesday, January 28th and 29th, 1922. There is important business to be done, and the meeting will be of great interest to all dairy men.

Prince Engage In Bear Hunt

The Prince of Wales engaged in his bear hunt with the aid of a team of men with four spears. Many women accompanied the hunting party. Numerous big black bears were killed. The Prince obtained his first kill by riding down his bear and securing a clean and vigorous thrust at vital spot.

How Famous Wrote Was Written

The famous "Blue Danube" waltz came to Johann Strauss one day while he was strolling in the park with his wife, and having not a scrap of paper at hand, he wrote it on the white then collar worn by Frau Strauss, as his own line was impeded.

Our Idea of a martyr is a man who

merely wears a handsome shirt.

Attached to the Salvation Army in

London is a deaf and dumb corpse.

ITEMS OF LOCAL INTEREST

Don't forget the concert in the Amus-U theatre tonight under the auspices of St. Ambrose church choir.

Don't miss seeing the hockey match in R. Scott rink on Saturday evening. Game called for eight o'clock sharp.

FOR SALE—Pure bred B.P.R. cockerels, early hatched, \$1.00 each. Mrs. L. A. Quinn, Bayview. 2-31

Most of the stores in town are now having January sales. As a result many splendid bargains may be secured.

There will be a program of cards and dancing at the Young Men's club on Saturday evening of this week. An invitation is extended to all to attend.

Medicine Hat is holding its annual hospital this week. There are a number of risks in attendance and the games are progressing favorably.

St. Ambrose W.A. will have a sale of house cooking and groceries at the G.W.V.A. club rooms at 3:00 p.m. Saturday afternoon, Jan. 26, from 9 to 6. A musical program.

The Red-cliff hockey team played its second schedule game in Medicine Hat last Monday. Unfortunately they again went down to defeat to the tune of 11 to 2.

Anyone wishing a good home in Redcliff, three blocks north of Italy's home on First street, also opposite. Write up at Lindsay, Cal. 10, south west, Arlingdon.

P. H. Wedderburn leaves today for Calgary to prepare for the annual meeting of the Medicine Hat U.F.A. District Association. He will also attend the U.F.A. convention.

FOR SALE—Frame house in good condition and well located, will cost less for cash. Write for particulars apply to Mrs. Martha A. Brink, Redcliff.

The farmers of the Lamont district have sent notices consigning of supplies to be distributed among the needy farmers of the southern portion of the province. In this shipment is a large quantity of rolled oats put up in 28 lb. sacks.

The Alberta Provincial Seed Fair will be held in Edmonton on Feb. 18th to the 26th, under the auspices of the Seed Branch of the Provincial Department.

ment of Agriculture. This fair is held for exhibition, sale and exchange of farm stock.

Officers and members of the local G.W.V.A. are giving a dance in their rooms on Wednesday evening, Jan. 15th. Jimmy Horne's orchestra will supply the music. Admission: gents 10c, ladies 25c. All are invited to attend. If this, the first dance of the season proves a success, it is the intention to put on a series during the balance of the winter months.

P. H. Wedderburn has now completed all his expenses for the U.F.A. campaign in this constituency during the general election. The total expenses amount to \$1,078.00. This amount is made up of rent for headquarters, committee room, halls for meetings, printing, stationery, postage, telephone and travelling expenses for the candidate and the speakers who assisted him. Considering the large extent of territory which this riding takes in these expenses are very light.

MANITOBA U.F. PRESIDENT

Issues Grave Warning Pres. J. L. Brown, M.P. of the Manitoba U.F.M., has issued a warning that the organized farm-ers of Manitoba have reached a most critical period in their history, declaring that the near future will indicate whether the movement will succeed or wreck itself on the rocks of direct political action.

A NEW ATLANTIC LINER

The twin-screw steamer "Montclair," built for the Canadian Pacific line, is in their Cabin Service between Liverpool and Canada. She was successfully launched recently from the yard of the builders Messrs. John Brown & Co., Ltd., at Clydebank.

The "Montclair" is the last of three vessels which have been built for the Atlantic Service, and is sister ship to the "Montcalm."

The other ship of the three, the "Montrose," built at the Fairfield Shipbuilding and Engineering Co.'s yard, Glasgow, is expected to leave Liverpool in "C" Deck forward.

The "Montclair" is like her sister-ship, is built to Lloyd's highest standards, and meets all the requirements of the Board of Trade as a passenger ship. Her principal particulars are as follows:

Length 300 ft. 0 in. Breadth 40 ft. 0 in. Depth 24 ft. 0 in. Gross Tonnage about 12,000 tons.

The vessel is of the Steamer Deck type, with the Bridge Deck extending almost the full length, and long in front of the funnel. She has a very stern, two masts, and two funnels, giving her, when completed, a very imposing appearance. Twelve watertight bulkheads extending to "C" Deck divide the ship into thirteen watertight compartments. The cellular double bottom, in which are stored oil fuel, reserve fuel water, fresh water, and water ballast, extends to the full length of the ship, and is well up the bilges, giving additional protection.

The machinery of the ship is of the latest type, and is of the highest quality. The main engine is a vertical triple expansion engine, and the auxiliary engines are of the same type. The ship is also fitted with a large number of lifeboats, and is provided with a complete outfit of life-saving appliances.

The ship is also fitted with a large number of lifeboats, and is provided with a complete outfit of life-saving appliances. The ship is also fitted with a large number of lifeboats, and is provided with a complete outfit of life-saving appliances.

BOY SCOUT NEWS

The greater part of the evening of the meeting was spent in testing boys on the first aid course. A number of boys passed the big test and thereby completed all the test required for the second class.

Mr. Orman announced before closing that the next scout meeting would be held on Tuesday next instead of Thursday.

On Tuesday work on the first aid was the main item for the evening, and a few more scouts succeeded in completing their first aid work.

Just before closing Mr. W. Semper gave the scouts some physical drill.

The club are to meet on Tuesday after this, meetings to commence at 7.30.

SCHOOL NEWS

A very enjoyable evening was spent Friday in the school under the auspices of the Literary society. The evening was well begun by an hour of skating. After this the company proceeded to the high school room, where a very good program was given.

The company consisted of the following: Misses: Alice, Bessie, and Ethel. Messrs: John, William, and Robert.

The program consisted of the following: A play, "The Boy Scouts," and a song, "The Boy Scouts' Song."

The evening was very enjoyable, and the company was well received by the school authorities.

The school authorities were very pleased with the program, and the company was well received by the school authorities.

What Provincial Government Has Done For Labor

"Our political opponents say that we have not done anything in regard to the unemployed question, but we have done more in this connection in three months than past provincial governments have done in 15 years." This statement from Alex Ross, minister of labor, before Tuesday's session of the Alberta Federation of Labor convention, brought forth a burst of applause and cheering that was only exceeded by the conclusion of the address.

"The first thing we did upon taking office was to accept the proposition of the federal government to share one-third of the expense of relief work," declared the new minister of labor. This had never been done before by the Alberta government.

The minister of labor told of the provincial government's expenditure of \$850,000 for public works and relief work in the cities. This amount does not include incomplete public works.

"Close up, Archie, there is a day of reckoning coming."
